Title: Produktion

Brief description:

With its blend of practice-oriented topics from the spheres of technology and business, Produktion magazine reaches decision-makers of all levels in the manufacturing industry. These include brand-focused decision makers, production managers and production-related departments such as design and logistics (who decide what volumes to buy and which technologies to deploy) as well as directors and CTOs (who decide what to finance). Produktion supports you with extensive reports on trends and innovations from the world of industry, examples of practical applications, product innovations and new top technologies for the shop floor. Competitor and market analyses

help readers to make commercial decisions. Produktion magazine sets itself apart from other publications through its high proportion of self-researched articles and exclusive topics.

Target audience:

Produktion enables you to reach decision-makers of all levels in the manufacturing industry, from technical staff and operators to production managers and heads of departments integrated in the production process – such as product design and logistics – to directors and CTOs.

Data formats: Deliver data as PDF/X-1a (2001 or 2003), images at least 300 dpi resolution, line scans (e.g. texts, graphics) at least 800 dpi. Attachment in original format plus 3 mm trim and crop marks.

Proof:

For color ads, the customer must supply a color proof with Fogra Media Wedge V3.0 with test protocol. If this is not supplied, the customer will not be entitled to make any compensation claims for color deviations.

Guarantees:

1. No guarantee is issued that ads will be included in specific numbers or in specific issues or at specific locations in an issue.
2. The company guarantees the flawless printed reproduction of ads on print paper. This requires suitable printing templates to be supplied by the customer (cf. information in price list).
3. Color ads: If the customer sends digital masters for color advertisements, the customer must also supply a color proof. If this is not supplied, the customer will not be entitled to make any compensation claims for color deviations.
4. In the event of obvious defects, the customer must raise a complaint no later than two weeks after receipt of the invoice. In the event of non-obvious defects, the customer

must raise a complaint no later than one year after the release of the publication in question. In the event of improper printing of an advertisement despite flawless master copies being supplied on time and a complaint being raised promptly, the customer may demand that a flawless replacement advertisement be printed (cure). The claim to a cure is excluded if it would entail disproportionate costs for the company. If the company allows a reasonable period of time set to perform the cure to lapse away, the customer has the right to withdraw from the contract or claim for a price reduction proportionate to the level to which the purpose of the advertisement was impaired. Claims under guarantee asserted by business customers shall lapse within 12 months after publication of the advertisement or supplement in question.

5. If any defects are not immediately identifiable in the print documents and only become clear upon printing, the customer shall not be entitled to assert any claims for unsatisfactory printing.

6. If the customer ignores the company's recommendations regarding the creation and transfer of digital print documents, the customer shall not be entitled to assert any claims for defective publication of advertisements.

7. The customer is liable for ensuring that the files they supply are free from computer viruses. The company is entitled to delete files infected with computer viruses without this giving rise to any claims on the part of the customer. The company also reserves the right to assert claims for compensation if computer viruses cause further damage to the company.

8. In relation to materials provided by the customer (bound inserts, supplements, etc.), the company assumes no liability for the accuracy of the quantity or quality of materials designated as having been delivered.

DEN AUTOMOBILBAU NEU ERFINDEN

Erfahren Sie mehr über die aktuellen Herausforderungen der Automobilindustrie sowie die neuesten Trends und Technologien.

Kostenloses Whitepaper: Den Automobilbau neu erfinden

Gesellschaftlicher, politischer und ökologischer Druck zwingen die Automobilindustrie zu einer Neuausrichtung. Elektrifizierung, kundenindividuelle Massenproduktion, Robotertechnik, Automatisierung und additive Fertigung verändern Fahrzeuge und damit auch die Fertigungsprozesse, die zu ihrer Produktion nötig sind.

In diesem Whitepaper erfahren Sie mehr über die aktuellen Herausforderungen, mit denen die Automobilindustrie heute konfrontiert ist. Außerdem erklären wir, wie moderne Technologien wie hybride Fertigung, Simulation und Automatisierung dabei helfen können, die nächste Fahrzeuggeneration schneller auf die Straße zu bringen.
